

GEOSKY LLC AIRLINE QUALITY POLICY

GeoSky Quality Assurance Policy is to operate at all times in a safe manner and fully in accordance with relevant regulatory such as GCAA requirements for both ground and in-flight activities.

To achieve this objective GeoSky will maintain, on a continuous basis, an effectively managed quality assurance programme for all its services according to GCAA applicable rules and regulations.

The Quality Assurance Programme takes into consideration all the operational aspects of our services and provides controls at each stage of the operation to ensure compliance with related authorities.

The quality assurance procedures establish the individual requirements of each operational stage undertaken. This will allow staff to operate at a higher level of competence and safety.

GeoSky will ensure that all employees are understand, implement and maintain the quality objectives detailed in this manual.

The management of GeoSky is firmly committed to the concept of Quality Assurance and requires total participation of all employees.

Managers are entrusted with the authority and responsibility to implement the quality assurance programme throughout the Company on behalf of the Director, and in particular the Quality Assurance Manager has the responsibility and authority to ensure this implementation is effective and to report directly on such matters to the Director.
